Re: WZMQ Frequency Change - MM Docket No. 93-136
RM-8161

Dear Chairman Sikes:

I have personally noticed constant and totally destructive interference to the reception of other Upper Florida Keys radio stations when I am anywhere near the WKLG/WZMQ tower in Key Largo. My advisors tell me this is because WKLG and WZMQ are operating from the same tower - and that this interference would be eliminated by the proposal of WZMQ to change its frequency.

I have also been told that our electrical utility, Florida Keys Electric Cooperative Association, Inc., utilizes local radio station WCTH's subcarrier to transmit electrical load control signals to various electrical devices, thereby shedding load during peak demand periods. With the WCTH signal being blocked on the utility's electric load management receivers, the utility's ability to furnish an uninterrupted supply of electricity to the Keys during peak load periods is adversely effected - and load demands on the system are increasing.

It would definitely be in the public interest to resolve this interference problem as quickly as possible. Please consider these comments in the above rule-making proceeding.

Sincerely,

Mary Kay Reich
